March 16 - CARE Presentation

March 18 and 19 - Student-Led Conferences

March 19 - STARS Day - Kindness - Spirit Day (wear fun socks)

March 20 - 29 - No School - Spring Break

Curriculum Update:

Religion:

During Lent, our Holy Family students will be participating in a "Lifestyle Awareness Calendar" focusing on all the blessings they have and remembering those in need. Please remind your child to check their calendar each day. We will also be collecting food items for the Red Deer Food Bank. Please donate if you are able.

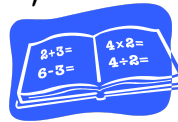

Language Arts:

We will continue to focus on reading comprehension, reading accuracy, reading fluency and expanding vocabulary. We will also be working on both descriptive writing and elaborative detail. We have been working with the students to write a complete paragraph. They have now finished writing their first paragraph and will continue to work on developing their writing skills.

Math:

We have begun our unit on Linear Measurement. Take some time to make reference to distance and perimeter around your home and in your daily life. Following linear measurement, we will begin working on Multiplication.

Math Facts: It is so important for your children to know their basic facts (addition and subtraction to 18) and that they have a good grasp of adding and subtracting 2 digit numbers. Please have them practice a couple of equations every evening to help improve their fluency and accuracy with these concepts.

Math X Table Facts:

Soon we will also begin to work on our multiplication facts. Students need to know up to 5X5 this year. For now, please practice 0, 1, and 2 times tables. We can use our knowledge of skip counting to help us with our facts (ie. 0,2,4,6,8, etc). We refer to multiplication as "groups of".

Science: We are finishing off our Hearing and Sound Unit. Our next topic for science is called "Building and Testing". This is a combination of our "Building with a Variety of Materials Unit" and "Testing Materials and Design". We will use objectives from both units interchangeably. It involves examining a variety of materials and designs for their suitability as building materials. We will use this knowledge in our building process. If you have neat pictures of cool buildings, bridges or different structures, please send them and we will put them on our bulletin board!

Social: Our class is completing their culminating activity for the country of Tunisia. Students will present their Google Presentation to the class this month.

This month students will also work on creating brochures about our next country, Ukraine. We will be taking another flight to the country of Ukraine. There we will learn about the traditions and celebrations in Ukrainian culture. We will be discussing their quality of life, the services they need, their resources, as well as their government.

Have a great month!

Mrs. Huddleston
